

**We are in the middle of a very sudden revolution.  
The lives of our youngest are at stake.**

**The government has made steps in the right direction,  
but it still allows fossil fuel exploration to continue.**

**Through ACC and KiwiSaver investments it pumps 1.5  
billion dollars into fossil fuels.**

**It has also refused to recognise the real cost of our  
highest carbon emitters.**

**The move to renewable energy is happening too slowly  
and our dependence on gas is not being addressed.**

**These things prevent us from getting to safety.**

**A responsible government could address these things.**

**It needs to hear that from you.**

**Come to the Parliament Lawn at 12:30 to say it.**

**Let's change the future.**
