

Every Friday, from 12:30 to 13:30

fridaysforfuture.nz

Since we started (May 2019):

- **Councils declared a climate emergency;**
- **the Zero Carbon Act was signed;**
- **the Climate Change Commission was formed;**
- **Parliament declared a Climate Emergency**

So why are we still here?

This emergency requires some big changes. And we're not seeing them:

- **Roads are increasing**
- **Fracking is continuing**
- **Airports are expanding**
- **Emissions are rising**

We're still acting as if carbon emissions are free.

They cost us the world.
